

## Genesis HealthCare and Powerback (GRS) Safe Resident Handling

As part of the Safe Resident Handling initiative, all Genesis HealthCare and Powerback (Formerly known as GRS) facilities have gotten or will be getting new lifts to ensure there is only one brand per facility, though the brand of lift may differ depending on the facility. The initiative is being conducted in three phases to ensure all Registry Personnel are properly educated on how to use the lifts appropriately. All Registry Personnel currently working will complete all three phases of training no later than June 30, 2022 and all new hires will have to complete this training starting July 1, 2022.

For new Registry Personnel to comply with the requirements, Genesis HealthCare and Powerback have made these training videos available to all Registry Personnel through [vitalLearn](#). The completed transcript is required to be uploaded to the electronic platform profile for all new Registry Personnel as of July 1<sup>st</sup>, 2022.

For Registry Personnel currently working, the below portion of this attestation form is required to be uploaded to the electronic platform profile before July 31<sup>st</sup>, 2022.

Once Phase 2 and Phase 3 are completed at the center, the center will then provide a copy of the attestations to the Registry Personnel confirming completion. These attestations must be kept on file by the Staffing Vendor and supplied during monthly audit requests.
